To Whom It May Concern:

Benchmark Contractors, Inc. has had the pleasure of working with American Wrecking, Inc. on numerous projects in the past five years. The jobs have ranged from small project demolition work to large, complex structural demolition that required extensive phasing, material salvage, and hazardous materials abatement.

We have found their work to always be exceptional and professional. Their preconstruction and estimating services are equally outstanding, always responsive, accountable, and highly competitive. Having American Wrecking on board gives us all the confidence that our project will start off on the right foot.

We highly recommend American Wrecking for any future work.

Best Regards,
